

BRICK BATTERY LINE

All Models available in 3 Stud and V-Mount

HC9-Mini

*The ultimate
98wh Li-Ion pack
for Digital Cinema*

98Wh (14.8v, 6.6Ah)
Size: 90 x 118 x 48mm
Weight: 0.64kg
Max Continuous Load: 12A
Ptap & USB 5v

NANO 98

*The slimmest
98wh Li-Ion pack for
Gimbal and UAV production*

98Wh (14.8v, 6.6Ah)
Size: 97 x 149 x 41mm
Weight: 0.64kg
Max 8A
P-tap & USB 5V

Hypercore 98 Slim

*30% slimmer
than our original 12Amp
High Draw*

98Wh (14.8v, 6.6Ah)
Size: 97 x 149 x 41mm
Weight: 0.64kg
Max Continuous Load: 12A
Ptap & USB 5v

Hypercore Prime

*An air travel friendly
190wh Li-Ion battery pack
that splits in two*

190wh (14.8V, 13.5 Ah)
Each Half: 95wh (14.8V, 6.7Ah)
Size: 97 x 168 x 61mm
Weight: 1.18kg
Max Load: 10A

Hypercore-150

*150wh of
power for Broadcast*

150Wh (14.8V, 10.3 Ah)
Size: 97 x 149 x 41mm
Weight: 1.09kg

C E L L P A C K

At the heart of any battery pack needs to be a great quality cell. The 18650 Lithium Ion cell employed in our battery packs ranks the best in the Li-Ion industry. The packs are designed with the specific purpose of handling and sustaining high power draws. Core SWX's proprietary battery management firmware assures the cells are always balanced and at an optimal state to withstand up to a continuous 12A load for extended periods of time while not diminishing service life. This battery management firmware also dictates the charge routine when during charging, increasing battery safety and efficiency. To provide the cells protection against accidental impacts; the cells are incased in an overmolded, non-slip rubberized housing, something Core SWX has been offering for nearly a decade. All these advancement in the mobile powering space have allowed us to offer a rating of up to 2000 charge cycles on these packs, currently the best in the industry.

BRICK BATTERY FEATURES

USB Power

Runtime LCD

LED Gauge

Hibernation

Travel Safe

8 Cell Design

Compatible Charging

Camera Communication

Rubberized Housing

Power Tap

Storage Mode
