Filter thread	M82 x 0.75
Approx. size[Φ x Length]	Φ85 x 163.8mm
Approx. mass(without lens hood)	1.6kg

Main features of the LA16x8BRM

Compact/lightweight and 4K resolution

The rear focus mechanism enables the weight of the lens to be reduced to approx. 1.6kg. The size provides optimal balance with Blackmagic URSA Broadcast with 4K performance. Featuring a 16x zoom ratio suitable for EFP, news and studio shooting.

Handheld style

The compact body weighing approx. 1.6kg provides the optimal balance with the Blackmagic URSA Broadcast, reducing the burden of shooting handheld and provides excellent operability.

EFP/Studio style

The use of FUJINON accessories enables precise control of zoom and focus while on a tripod. Mounting the camera on a tripod also enables efficient studio or field style shooting.

Electronic flange back adjustment function

A single button on the lens provides electronic flange back adjustment to allow focus while performing zoom operations. The electronic system provides faster and more efficient adjustment.

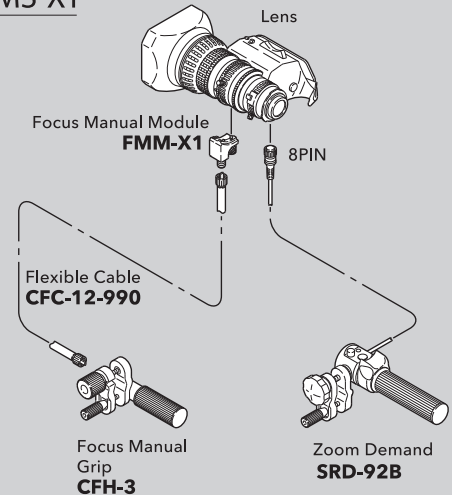

Macro function

The macro function allows for closer shooting than MOD up to 0.05m by operation of the unique focus ring. This enables spectacular close-up images at 4K resolution.
