

Teradek RT wireless Fi+Z systems

Teradek RT combines premium lens control technology with smart design for unparalleled accuracy and dependability on set.

Teradek RT motor driver receivers (MDR) are extraordinarily easy to mount, require little power, and support up to 3-channels for focus, iris, and zoom control. The Latitude M is a 2-channel receiver with RED DSMC and DSMC2 camera control.* Its small, lightweight design makes it perfect use on gimbals and drones.

MK 3.1 wireless controllers move your lenses with perfect accuracy and offer up to 6 mappable axes and an adjustable fluid feel control knob. Wireless commands are transmitted using FHSS over 2.4GHz, which can cut through the toughest interference at a distance up to 5000 ft.
