GREEN SCREEN | Collapsible Chroma Key Panel

A rocksteady solution optimized for camera chroma keying, Green Screen sets the stage for truly immersive broadcasting in a matter of seconds. Simply flip open the aluminium case, lift the handle to a suitable height and let the pneumatic x-frame automatically lock your canvas in place. That's it.

Ideal for even the tightest of workspaces, Green Screen guarantees a wrinkle-resistant, chroma-green surface. All you need to do is turn on some lights, take a seat, and work your creative magic.

M.2 4X4 PCIE CARD (SILENT) | Four M.2 NVMe SSD Slots On a PCIe 3.0 x16 Card for Mac and Windows (Silent)

If you need to add internal storage to your computer and ultra high-speed data transfers are critical to your work, you need an NVMe SSD-based upgrade. Individually, M.2 NVMe PCIe SSDs offer tremendous performance, but Sonnet's M.2 4x4 PCIe Card enables you to mount up to four of them into a single x16 card slot and combine their performance. No matter how you use it, this card can transform the way you work.

EGFX BREAKAWAY BOX 750EX | Thunderbolt 3 Expansion System

Transform Your Thunderbolt Computer Into a Graphics Workstation. Many popular computers are equipped only with integrated graphics or low-power discrete GPUs that bottleneck performance when performing these tasks. Happily, there's a simple path to greater productivity—add a Sonnet external GPU (eGPU). The eGPU Breakaway™ Box 750 and 750ex Thunderbolt™ 3 to GPU PCIe card expansion systems boost your eGPU-compatible computer's graphics performance by connecting a high-performance GPU card to your computer via a single cable.

RACKMAC MINI | 1U Rackmount Enclosure for Mac Mini

RACK 'EM UP!

Mac minis are great general-purpose computers, and make sweet servers for many applications. However, integrating them into a rack poses some challenges. How do you securely mount the minis? How do you keep them cool? How do you turn them on without pulling them out of the rack? How do you plug in a thumb drive for a quick update? Sonnet's RackMac mini solves all these challenges and more.

EGFX BREAKAWAY PUCK - 5500 XT | eGFX Breakaway Puck Portable eGPU System - 5500 XT

Do you have an Intel®-based MacBook Air®, MacBook Pro®, Mac mini®, iMac® or iMac Pro with Thunderbolt™ 3 ports? If you need to run pro editing, rendering, colour grading, animating and special effects apps, you need a graphics processing (GPU) power boost. Whether your computer completely lacks a discrete internal GPU or has a GPU without enough power to adequately support the needs of your current workflow, Sonnet has a pair of solutions that will instantly boost your computer's graphics performance anytime and anywhere you need it. Why not pack a Puck?!

SOLO 10G | 10GBASE-T 10Gb Ethernet Thunderbolt 3 Adapter

Video content creation and output has moved on from 1080p HD to 4K and beyond, ushering in 10 Gigabit Ethernet (10GbE) as the new networking standard for post-production shared storage workgroups and other bandwidth-intensive workflows. On the infrastructure side, low-priced 10GbE switches with RJ45 (copper) have cut the cost of set up, resulting in very rapid adoption. The problem is, most computers aren't equipped to get you connected. For computers with a Thunderbolt™ 2 port, there is now an equally affordable 10GbE adapter—Sonnet's Solo10G™ (Thunderbolt 2 Edition), a powerfully simple solution for adding 10GBASE-T 10GbE network connectivity to Mac®, Windows®(1), and Linux® computers with Thunderbolt 2 ports.
