CRANE 2

3-Axis Stabilizer with Follow Focus

The Zhiyun Crane 2 three-axis camera stabilizer delivers film-grade performance and precision motion. Its follow focus controller, OLED display design, POV Mode and quick control dial makes it very easy to create stunning images.

You can monitor the stabilizer status at a glance, and intuitively change camera & gimbal settings and movement via the tactile handgrip.

MOVE WITH YOUR FOCUS.

FEATURES

Real Time Follow Focus

An integrated follow focus wheel on the body, Crane 2 allows $\pm 0.02^\circ$ precision real time focus control via the camera connection cable. Keep your subject in focus without having to take your hand off the gimbal.

3.2KG Max. Payload

The 6th generation Instune algorithm delivers 50% increase in motor torque and 20% improvement in noise reduction. Crane 2 sets a new benchmark for the industry supporting a max. payload of 3.2kg, making it suitable for most models of DSLR and mirrorless cameras.

Instant Precise Attitude Compensation

32-bit high-speed MCU parallel control technology provides a 100% improvement in respond speed, CRANE 2 gets high above the industry standard with its cutting-edge compensation system and unparalleled anti-shake stabilizing performance.

18 Hours
Extensive Battery Runtime

Newly Designed Thumbscrew for Quicker Balance Adjustment

Designed with easy-to-use thumbscrews and a quick release plate, you can mount, and balance your camera to get ready for shooting in 60 seconds. Start shooting anywhere, anytime.

Intuitive OLED Display

The intuitive interface design helps you easily identify the connection status, battery level, control mode and multiple camera params, giving you full control over every detail.

18 Hour Runtime

An 18 hour battery life for high-intensity shoot and emergency phone-charging means you should never miss a shot.

Innovative Quick Control Dial Design

The quick control dial on the control panel is like an integrated extension of your camera. You can either press or rotate the dial to change various camera parameters, such as TV, AV, ISO and EV, giving you seamless camera control.

Complete Kits with Elaborate Details

Crane 2 comes standard with a comprehensive accessories kit, including camera control cables to connect with various cameras brands, an aluminium tripod, a carry bag, as well as a Manfrotto quick release plate.
