

A man in a grey suit is seen from the back, holding a white sheet of paper. He is standing in front of a teleprompter. The teleprompter consists of a black carrying case with a silver handle and a black tablet mounted on a stand. The tablet displays text that is partially obscured by the man's hand. The background is a blurred crowd of people.

# TELEPROMPTER COLLECTION

In today's connected world, anyone can be a broadcaster. But for many people public speaking can be extremely stressful. Teleprompters can help inexperienced speakers present at large conferences, product launches or live productions in a relaxed and professional manner, without fear of forgetting their lines.

Datavideo design and manufacture a range of smart teleprompters for the home, the studio, for corporate and conference applications. All Datavideo teleprompters come with dvPrompter Plus, an iOS/Android app that makes it simple and straightforward to prepare scripts or cue sheets on location or on the move.

### TP-300

For mid-sized cameras

The TP-300 is ideal for a theatre setting or a video studio and features an adaptable mounting bracket that can be adjusted to receive virtually any tablet.

# dv PROMPTER PLUS APPLICATION

## FLEXIBLE CONTROL OPTIONS

dvPrompter Plus supports direct talent-led control via the WR-500 Wired/Bluetooth remote control or over IP using any web browser.

Both options allow the presenter to pause and resume the scroll, increase and decrease speed, increase and decrease font size, jump to specific points within the script (break markers) and switch between scripts in the playlist.

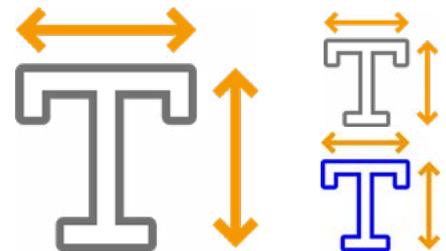

Remote monitoring via WiFi or Ethernet

Control and monitor the prompter over a local network using any device with a web browser.

## POWERFUL RICH TEXT EDITOR

Remotely change the font size, type, colour and justification on a per script basis and even use multiple fonts within a single script.

The editor also has support for embedding images and creating playlists from multiple scripts.

## SYNCHRONISE MULTIPLE TELEPROMPTERS VIA IP\*

Connect multiple teleprompters together using Datavideo's unique IP synchronisation over Ethernet or WiFi.

\*In app purchase required for web browser control and IP synchronisation.
