LIVE VIDEO PRODUCTION ON THE RUN

DataVideo's mobile studio is highly portable, fast to set up and produces great looking live and recorded video programming for output to big screens, connected audiences.

- **Easy To Use** Connect three cameras using just one low-cost Ethernet cable
- **Live to air** Stream to social media and output to projectors or large format displays
- **Capture and Deliver** Stream and record simultaneously.
- **Plug and Play Cameras** Using HDBaseT, cameras are powered and controlled by the HS1600T switcher
- **Mobile** The HS1600T switcher's robust briefcase design makes it exceptionally portable
- **PTZ Cameras** PTC-140T 20x zoom and PTC-150T 30x cameras deliver beautiful HD pictures
- **Camera Presets** switch from podium to audience to a panel shot at the touch of a button
- **Graphics** connect a laptop via HDMI for TV-style on-screen graphics and titles

Typical Fast Install Workflow

Conference Production

Datavideo's HS1600T is so simple and fast to set up that AV teams can install the cameras and switcher in minutes. It's ideal for conference halls and breakout rooms, giving producers the flexibility they need.

HS1600T produces a live multicamera output, an archive recording and a live stream, all in HD.

Live Sports Streaming

Cover home and away matches, tours and training sessions using the same portable equipment. Lightweight yet robust, the switcher and cameras can be used in virtually any venue to produce pro-quality programming.

Connect to your preferred online platform for live streaming to your fanbase - free to air or pay per view.
