

AV and Video in Worship

- Multi-camera production
- Easy recording
- Live webstreaming
- Internal video distribution & display
- Video walls & projector output

datavideo®

• Multi-camera production

A single operator can control up-to 7 HD cameras. Low-cost, quick to install and easy to manage, with excellent image quality. Datavideo equipment is competitively priced, making it ideal for houses of worship

PTC-120 cameras | RMC-190 controller

• Vision Mixing

Switch between multiple video sources, super-impose logos and mix in graphics. View every source on the preview and program monitors. Our devices are easy to use and designed to give years of use. Even a keen amateur can quickly get to grips with the kit.

SE-2200 Switcher | TLM-170G Monitors

• Live Titling

Make a live worship event come alive by adding titles and motion graphics for real-time updates, messages and information.

CG-200

• Video Recording

Capture hours of high quality video to standard hard disks. The files are ready to edit or play back - or burn to DVD for church members that can't attend in person.

HDR-60

• Video Distribution

Encode the mixer's output for video streaming to global congregations or distribute video to screens within the church using video cable.
