# Take control with Ninja V

## Capture your vision

The Ninja V monitor/recorder takes all your creativity and brings it to life in the video you capture, regardless of whether you're shooting cinematic productions, or vlogs for your social media channel. Whether you shoot HDR or regular SDR. Whether you use a professional cinema camera or a prosumer mirrorless camera.

Ninja V takes exactly what your camera sensor is capturing, enhances it and allows you to view and record it in amazing detail. This portable powerhouse gives you complete confidence in what you're capturing, so you're free to push creative boundaries more than ever before.

Ninja V (<u>AO-ATOMSHBH01</u>)

5" monitor

# MONITORS

#### Up your monitoring game with a compact and lightweight Shinobi HDR monitor.

Available in two screen sizes - 5" and 7" - Shinobi is a 'monitor only' device which attaches to your camera and is packed with an extensive suite of scopes and simple one-touch operations.

- Shinobi 5 (<u>AO-ATOMSHBH01</u>) 5
- Shinobi 7 (<u>AO-ATOMSHB002</u>)
- 5" monitor 7" monitor

Optional 5 Sunhood available for Shinobi, Ninja V and Ninja V+. Simply snaps on and is great for sunny shoots outdoors that affect screen visibility.

 5inch Sunhood for Shinobi, Ninja V and Ninja V+ (<u>AO-ATOMSUN007</u>)

# **FILTERS**

#### Premium Performance in Lens Protection and Image Enhancement

Each Hoya filter is the result of research, know-how and advanced precision optical technology, backed-up by a comprehensive quality control system. Hoya manufactures a range of filters grouped into four main categories: General, Creative, Black & White and Special Effect, covering anything from simple polarisation to a 10-stop neutral density filter to create the best possible image.

## WIRELESS SYSTEM

# Azden Pro-XRe

Wireless audio gives the presenter the freedom to roam. Azden's Pro-XRe has a 100m range and delivers great sound quality. However, its big advantage is how it handles interference: many other systems struggle when they're in busy WiFi areas.

Azden's intelligent auto-scanning system keeps ahead of the game to give you the best possible signal at all times.

#### Product code: AZD-PRO-XRe

#### Frequency Spectrum Auto-Scan

PRO-XRe automatically scans the 2.4 GHz spectrum and selects the best available frequencies, avoiding interference-prone frequency bands.

#### Automatic Interference Avoidance

PRO-XRe constantly monitors WiFi traffic and automatically uses different frequencies when it detects the possibility of interference.

#### Signal Redundancy Technology

PRO-XRe sends 3 copies of its signal to the receiver at all times, each on a different frequency. If the system predicts interference, it instantly switches without interruption.

#### **Rechargeable Batteries**

The built-in, rechargeable lithium-ion batteries provide up to 21 hours of run time on the receiver and 15 hours on the transmitter.

#### Volume Control and Monitoring

The receiver includes a 3.5 mm headphone jack for monitoring, and a 6-step adjustable output gain control for optimizing audio levels with your camera.

#### Line-In Auxiliary Input

The transmitterhas a 3.5 mm auxiliary input. This can be connected to the output of an audio mixer, digital recorder or any other line-level source.

# GNARBOX 2.0 SSD Rugged backup device for your camera

1-touch back-up with data verification

- Water-resistant and toughened
- Fast-charge replaceable battery

# **BACK UP UNIT**

RECORD

GNARBOX

#### **GNARBOX 2.0**

GNARBOX 2.0 SSD is a rugged backup device for pro content creators who need the most reliable way to back up their files in the field. Unlike other storage solutions, its compact design and powerful on-board backup features make it effortless to manage files without a laptop.

With up-to 1TB SSD storage, SD slot, two USB-C ports, WiFi and mobile apps to complete essential workflow steps before returning to the studio, GNARBOX saves time and secures your data.

Code	SSD capacity
<u>GNAR-256V2</u>	256GB
