

AV SOLUTIONS | VIDEO IN THE ENTERPRISE

Video collaboration that does justice to your meetings and presentations

THE CHALLENGE

Today companies of all sizes are making increasing use of video conferencing as an everyday tool. It improves the efficiency of meetings and minimises travel time and costs for staff to attend, whilst also reducing their carbon footprint.

The evolution of these systems from bespoke hardware solutions to powerful Unified Communication (UC) software-based platforms has added capability and versatility.

At the same time these new solutions are driving demand for cameras that can provide the highest quality images, interoperability with other systems and the flexibility to operate in spaces of all sizes.

With environments ranging from small huddle rooms, through to medium sized meeting rooms and large conference facilities, a wide range of cameras of different capabilities are needed to match the demands of varying customer applications and budgets.

THE SOLUTION

The best solution is to use equipment that conforms to industry standard connections and control protocols. Professional models offer superior low light performance and simple integration with UC platforms.

Smaller meeting rooms
Choose a high-resolution sensor and a wide 120° viewing angle

Medium size rooms
Fixed cameras to shoot 2-3 angles

Medium size rooms
PTZ cameras to zoom, pan and tilt

Share and switch sources at the press of a button

Switch, record and stream events via touch screen control

Tap to share and present content, making meetings truly collaborative

THE MEETING

PTZ cameras for high quality video capture with accurate positioning.

Discreet camera with ePTZ & wide angle capture for video, conferencing views, record & stream.

Switch camera & presentation sources, create picture in picture & other custom views, record & stream.

Wireless presentation from laptops to large format display or projector in room.

THE INSTALLATION

Holdan is platform agnostic. Whatever your communication backbone, we have the technology to enhance the way you capture, share and collaborate with your teams and viewers.

We understand that there is no single solution that suits all scenarios. Our technical specialists have the tools and experience to help you enhance the way you communicate. Whether you're looking for a plug and play camera or want your communications to rival television programming, we can help.

THE OUTCOME

Enterprises are keen to convey a professional image to clients, staff and partners. They need the enhanced experience that pro-video capture and source switching brings to conferencing and communication systems.

The result is that annual conferences and financial statements are streamed to offices around the world. Quarterly business review meetings are accessible to satellite offices, with users local and remote able to interact with ease. Teams can participate in seminars remotely, or review workshops at a later time. Business is transformed.
