

The time for distance learning on a massive scale has arrived.

University students will depend on online teaching from the start of the 2020-2021 academic year.

They need to watch lectures, with accompanying presentation and supporting notes, on their phones, tablet devices and laptops.

We have the Panopto-certified equipment that can enable universities to deliver professional-grade lectures and seminars online. Look at our 'Good, Better, Best' products below for solutions to fit each level of budget.
