

## SHOOT | MIX | STREAM

Cost-effective and simple to use live production kit for YouTubers, gamers, teachers, musicians and businesses.

- Film from different angles
- Record your production to share online or on screen
- Mix computer graphics, gameplay and video
- Stream live to global audiences

## VIDEO STORY TELLING

## SHOOT

Panasonic's camcorders are compact and simple to use but give you incredible video quality. They have a fantastic zoom range, perfect for small studios, or the great outdoors.

## SOUND

Wireless microphones give you the edge. Affordable, high quality and easy to use. Azden Wireless microphone kits are perfect for studio and location sound. Crystal clarity without the tangled wires.

## PRODUCE

Blackmagic ATEM Mini has broadcast DNA in every button. With picture in picture and split screen effects, graphics and titles, you can switch between wide shots and close-ups to create the impact you're after. The output feeds a projector or big screen.

## RECORD AND STREAM

Connect the ATEM Mini to a laptop via USB to record your video and stream live to audiences on YouTube, Facebook, Skype, WebEx, Teams and Twitch.

Alternatively, use a Teradek Vidiu Pro to stream reliably without a Mac or PC. Simply plug the VidiU into broadband or WiFi and stream to Facebook, YouTube, or other platforms.
