SMOOTH 4

3-Axis Smartphone Stabilizer

Zhiyun Smooth 4 turns your mobile phone into a professional filmmaking camera, helping you create cinematic and dynamic footage with just your phone. The highly integrated control panel enables more convenient and faster operation, allowing adjustment of all camera parameters within fingertips. For the first time, a follow focus handwheel is introduced on a phone stabilizer, allowing smooth zooming and precise focusing. Special effects like Vertigo shots and fast scene transition are all now achievable on your phone. With a dedicated APP - ZY Play, Smooth 4 offers an array of smart features, from object tracking, panorama, preset timelapse, to customized MotionLapse and Hyperlapse. The only limit is your imagination.

BORN FOR MOBILE FILMMAKERS

FEATURES

Made for Mobile Filmmakers

Zhiyun Smooth 4 turns your mobile phone into a professional filmmaking camera, helping you create stable and smooth footage with just your phone. The design of integrated control panel can reduce the need to touch the screen, and help users control both the stabilizer and mobile camera directly with hot-key buttons. Create your own Hollywood movies with just your phone!

Focus Pull & Zoom Capability

The more professional and dedicated handwheel is built in Smooth 4, bringing you unprecedented smooth operation. You can zoom in or out as you want to take close-up shots. By pressing the FN switch button, the handwheel is configured as a focus puller, helping you achieve high-precision focus changes in real time to create creative shots.

PhoneGo Mode for Instant Scene Transition

Like a high-end sports car, Smooth 4 can enter PhoneGo mode and achieve full power in a flash. It can respond to every delicate movement without delay, perfect for shooting instant scene transitions.

ROLL-ANGLE
Time Lapse

Timelapse Expert

Integrated with AI technology, Smooth 4 can shoot Timelapse, customized Motionlapse and Hyperlapse. With user-defined angle settings on all three axis (plus AF and zoom adjustment at the same time), Smooth 4 opens new possibilities for impactful timelapse. The only limitation is your imagination.

Object Tracking

Smooth 4 supports high precision object tracking. You can frame the object you want to track on the screen, and the stabilizer will do the rest. With this feature, you can easily record events while also taking part in it.

Light and Durable

The high-quality compound materials and ergonomic design make Smooth 4 both rigid and light. The hammer paint texture adds a unique luster for a reassuring grip. The classic ergonomic design makes it easy on the eye and comfortable to hold.

Longer Runtime

Smooth 4's batteries last up-to 12 hours. The stabilizer can charge your phone directly during shooting with the battery level indicator giving you peace of mind. Shoot video all day long with no need to worry about power!

Unique Clip Design

The unique clip design gives users an easy transition between standby and startup mode by folding up the gimbal arm. It is a perfect filming and travel log tool.

Less is More

Smooth 4 is designed with a slider on its control panel and a trigger button on its rear, to easily recognize and switch between different gimbal modes.

ACCESSORIES

Mini Dual Grip

5.5" Display Monitor

Telescopic Monopod

Phone Clamp Combo

Camera Cheese Plate with 1/4" Thread

Dual Handle

Extension Ring with 1/4" Thread
