INOGENI REMOTE

User manual

How it works?

The INOGENI REMOTE is a device that can control the Mixer feature of the SHARE2 device. You just need to connect a RJ45 cable to the SHARE2 and the REMOTE and you will be able to communicate with the device using the push buttons at the top of the device.

Connectivity

SHARE2 - Back   REMOTE

Firmware upgrade

Simply run the INOGENI Updater program while the REMOTE is connected to the SHARE2 using a RJ45 cable. The Updater will then be able to detect if a firmware upgrade is needed.

Technical support
