

Gear in motion

OR-40 SOUND BAG HARNESS

The lightweight, ventilated Orca OR-40 Sound Bag Harness can be connected to any Orca audio bag to relieve equipment weight while recording.

Main Features:

- Easy to use on-location
- Internal USB port and built-in charging cable
- Vest and waist belt can be used separately

The Orca aluminum bar tool, which can only be used with the OR-40 harness, is designed to provide back support by moving the user's load from shoulders to waist

*OSP 1040-10 sold separately

Special pouch for batteries or power banks (not included)

EVA mesh fabric for maximum ventilation

Internal USB port with built-in cable for easy mobile device charging

Lower buckle that enables user to disconnect vest from waist belt

Quick-release buckle
