

AEROCASTER VERSION UP APPLICATIONS UPDATE

More features. No additional cost.

New updates to **AeroCaster LIVE** app for iOS and **AeroCaster Camera** app for iOS and Android.

The AeroCaster Livestreaming System is about to get even better. Update to Version UP (for free) and you'll be able to display live viewer comments, access enhanced scene setting, record without streaming, and utilise your iCloud Drive for storage.

ACCESS ICLOUD AND IPAD MEDIA CONTENT

Create titles and display video clips, photos, and graphics with data stored in **iCloud** or your **iPad's local media library**.

RECORD PROGRAM AND ISO VIDEO

Whether livestreaming or working offline, the flexible AeroCaster system lets you easily record productions for later editing and distribution. Capture the combined program output on the iPad and isolated video feeds on each phone. Then wirelessly transfer the phone videos to the iPad and put all the files together for post-production work in the app of your choice.

ENGAGE WITH VIEWER COMMENTS

When livestreaming on **Facebook**, **YouTube**, or **Twitch**, viewer comments are displayed within the AeroCaster LIVE app.

Version UP Apps Update

Your customers can update their apps via their devices and access the new features without having to update the firmware on their VRC-01 hardware.

Be sure to update your product listings with the revised copy on the **Dealer Assets** link opposite, and remember to update your demo stock too.
