by  
SmallHD

# 702 TOUCH 7-inch on-camera monitor

The 702 Touch is a cinematographer's best friend. With a ruggedly built frame, highly visible display, plenty of signal and power options, and world-class software tools, this 7-inch on-camera monitor is designed around the needs of the 1st AC and Director of Photography.

## DISPLAY

702 TOUCH is the perfect blend of brightness (1500 nits bright) resolution, colour reproduction, and power efficiency. Whether in studio or in full sun, the image on this 7-inch touchscreen monitor is simply beautiful.

## DATA-DRIVEN CONFIDENCE

SmallHD OS3 software gives Operators, AC's, DIT's and Directors industry leading imaging tools and a simplified user experience. Customise Scopes, Waveforms, and False Colour how you desire.

## SIGNAL & POWER OPTIONS

With two 3G SDI inputs, HDMI/SDI cross-conversion, DC power input, and Sony L Series battery bracket (Gold and V-Mount available), the 702 TOUCH is adaptable to any workflow, large and small.

## VERSATILE MOUNTING

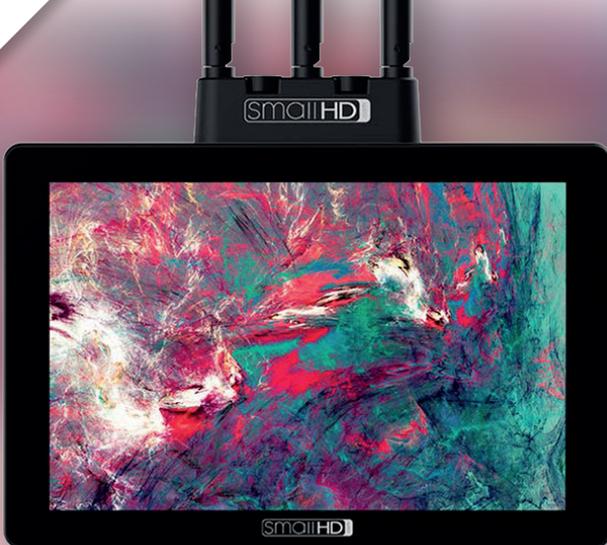

StrongArm 7 is the most versatile mounting option for SmallHD's field monitors. It connects directly to a camera's hot shoe or female 1/4-20 thread mount on a rails system. (Sold separately)

# CINE 7 500 RX Professional Monitor/Receiver

The Cine 7 500 RX is more versatile with the built-in 500 Teradek receiver. Hand this Full HD, wide-gamut monitor/receiver off to a DOP or AC pulling focus. It pairs easily with Teradek/SmallHD Bolt 500 transmitters.

## DISPLAY

Cine 7 is a top of the line professional 7" monitor with ARRI camera control. Its 1800 nit, daylight viewable display and 100% DCI-P3 coverage make this monitor an absolute joy to work with, in any production environment.

## DATA-DRIVEN CONFIDENCE

SmallHD OS3 software gives Operators, AC's, DIT's and Directors industry leading imaging tools and a simplified user experience. Customise Scopes, Waveforms, and False Colour how you desire.
