Wirecast

LIVE VIDEO PRODUCTION SIMPLIFIED

Wirecast is used by everyone from YouTubers to sports broadcasters in order to stream live and pre-recorded video to Facebook Live, YouTube, Twitter, Periscope and more.

- **Easy To Use** Switch video and mix audio shots with the click of a mouse to get the look you want.
- **Unlimited Destinations** Stream to any platform. Stream to more than one at a time.
- **Capture and Deliver** Stream and record simultaneously.
- **Unlimited Video Sources** Cameras, microphones, webcams, IP cams, NDI devices, capture cards, and more.
- **Conferencing & Remote Production** Send guests a link to join your live broadcast by Skype or other VC systems.
- **Beautiful Graphics & Animated Titles** Loads of built-in graphics and titles. NewBlue Titler Live is free with Wirecast.

The In-House Studio

Wirecast is very powerful, but exceptionally easy to use. It's ideal whether you need to record corporate news or produce live streaming programming.

Using NDI PTZ cameras, there's no need for a camera crew, as Wirecast controls every function, without the need for a dedicated control panel.

Live Sports Streaming

Wirecast is one of the most popular live production solutions for streaming sports. Used at major sporting facilities with tens of thousands of viewers, all the way down to youth league football games.

Use the built-in timers, clocks, stopwatches, scoreboards and Instant Replay feature to add professionalism to any live stream.
