

Wireless video just got better

BOLT LT

The essential, no-frills high performance wireless video system for filmmakers on a budget.

Available in 500ft (150m) and 1000ft (300m) range models, Teradek's Bolt LT series is a low-cost and easy to set up wireless video transmitter with virtually zero latency. It allows users to transmit uncompressed 4:2:2 HD video from their camera or drone to a receiver for monitoring, focus pulling, recording or live production.

FEATURES

- ⚡ Compatible with Bolt 500, 1000, Bolt XT, Sidekick II, Bolt 10K, and 703 Bolt receivers
- ⚡ SDI or HDMI input with matching loop through on the transmitter
- ⚡ SDI or HDMI output on the receiver
- ⚡ External antennas on the Bolt LT 500 transmitter and 1000 transmitter / receiver
- ⚡ Smaller and lighter chassis with robust mounting points make it perfect for handheld gimbal operators
- ⚡ Incredible price / performance ratio with the same wireless technology as the Bolt XT series
