Two new models for
for Autumn 2016

20Mhz

Standard Models

Bolt Pro models deliver reliable lossless HD transmission, advanced colour tools and signal management features. They feature lightweight 262g transmitters with 9 DFS channels. Each is also compatible with the Teradek Sidekick receiver.

Bolt Pro Models

- 300 300 ft / 100m range
- 600 600 ft / 200m range
- 2000 2000 ft / 600m range

Fast Reconnect Models

Bolt 1000 and 3000 feature 11 DFS channels and are designed to work under extreme conditions and offer instant reconnect times following a dropped signal. The 3000 model optionally works over 20MHz channels to offer an even more robust wireless link in challenging RF conditions. The transmitters are 20% smaller.

Models

- 1000 1000 ft / 350m range
- 3000 3000 ft / 1000m range

Best in class reliability
