

Productname: camRade tripodBag 2 ROLL
SKU: CAM-TRIPB-2ROLL
EAN/UCC: 8718591670145

Resistant against:

Description

In the tripodBag 2 ROLL you can safely transport your tripod (with a maximum length of 105 cm / 41.3 inches) in the most convenient way possible due to the added wheels on the bag.

This bag has a rectangular design which, in addition to providing maximum protection and making the bag easy to stack, reduces the risk of the bag rolling off trolleys or conveyor belts during your travels.

The adjustable divider allows you to customize the interior of the bag. Two separate compartments with zipper offer space to store various accessories. On top of the lid a transparent pocket is added for easy identification of your bag and/or contents.

The handgrips on the sides are also adjustable with an easy clip-system. This way you can balance out the bag which allows you to move freely and travel light with all your equipment safely protected.

Key features
